

Stoma
Skin
Soul

A range of applications
for the Dansac **TRE™ seal**

Multiple Positioning

- Providing protection and security where needed
- Can be used to avoid contact with mid-line wound in post operative setting
- Rotate seal to provide more barrier where skin folds or retracts
- Enables optimum fit between stoma and skin

Showing how to place the TRE™ seal to avoid contact with the mid-line wound

Wrap Around

- Can be used where the stoma end is larger than the base e.g. loop stomas
- Break open the seal at the narrowest part, and apply around the base of the stoma ensuring the ends overlap (see images)
- Close positioning of the seal at the mucocutaneous junction can assist with the protection of peristomal skin

Mucocutaneous junction - where your stoma meets the skin
Peristomal skin - area of skin around your stoma

Range of Applications

- Compatible with all stoma bags
- Can be applied directly on to the skin barrier or peristomal skin

Application to the peristomal skin

Additional Applications

- Can be stretched and moulded to form custom shapes
- Fills uneven skin surfaces around the stoma
- Helps improve the fit of the skin barrier

Three levels of protection

Sealing in Skin Health

Dansac TRE™ seal is more than just a seal.

With three levels of protection, the Dansac TRE seal has been designed to help keep skin naturally healthy.

pH balance

Designed to help manage the skin-damaging effects of digestive enzyme activity

Absorption

Helps absorb excess moisture to maintain skin's natural balance without the seal losing internal or external strength

Adhesion

Designed to provide a secure, flexible seal to protect the skin from stoma fluid and to be easy to remove

Code	Units	Hole diameter	Seal diameter
071-30	30/box	30 mm	57.5 mm
071-40		40 mm	70 mm

Code	Units	Hole diameter	Seal diameter
072-48	10/box	18 mm	48 mm
072-98	3/box		98 mm
